Human Metapneumovirus (HMPV) Rapid Test Kit

Human Metapneumovirus (HMPV) Rapid Test Kit

The **HMPV Rapid Test Kit** is a diagnostic solution designed to detect Human Metapneumovirus (HMPV) infections **quickly and accurately**. Discovered in 2001, HMPV is a pathogen responsible for respiratory tract infections, ranging from mild cold-like symptoms to severe conditions such as **bronchitis and pneumonia**. This kit provides results in **just 15 minutes**, streamlining the testing process for healthcare professionals.

This test kit is particularly valuable for managing cases in high-risk groups such as children, the elderly, and immunocompromised individuals. It is ideal for detecting symptoms associated with HMPV, including cough, fever, wheezing, and shortness of breath.

Designed for simplicity and reliability, the HMPV Rapid Test Kit is an essential tool for routine diagnostics or controlling outbreaks in any healthcare setting.

Note: For research use only.

FEATURES/ADVANTAGES

► Easy Visual Interpretation:

Provides clear and straightforward results for convenient diagnosis.

► Convenient Procedure:

Designed for ease of use in various healthcare settings.

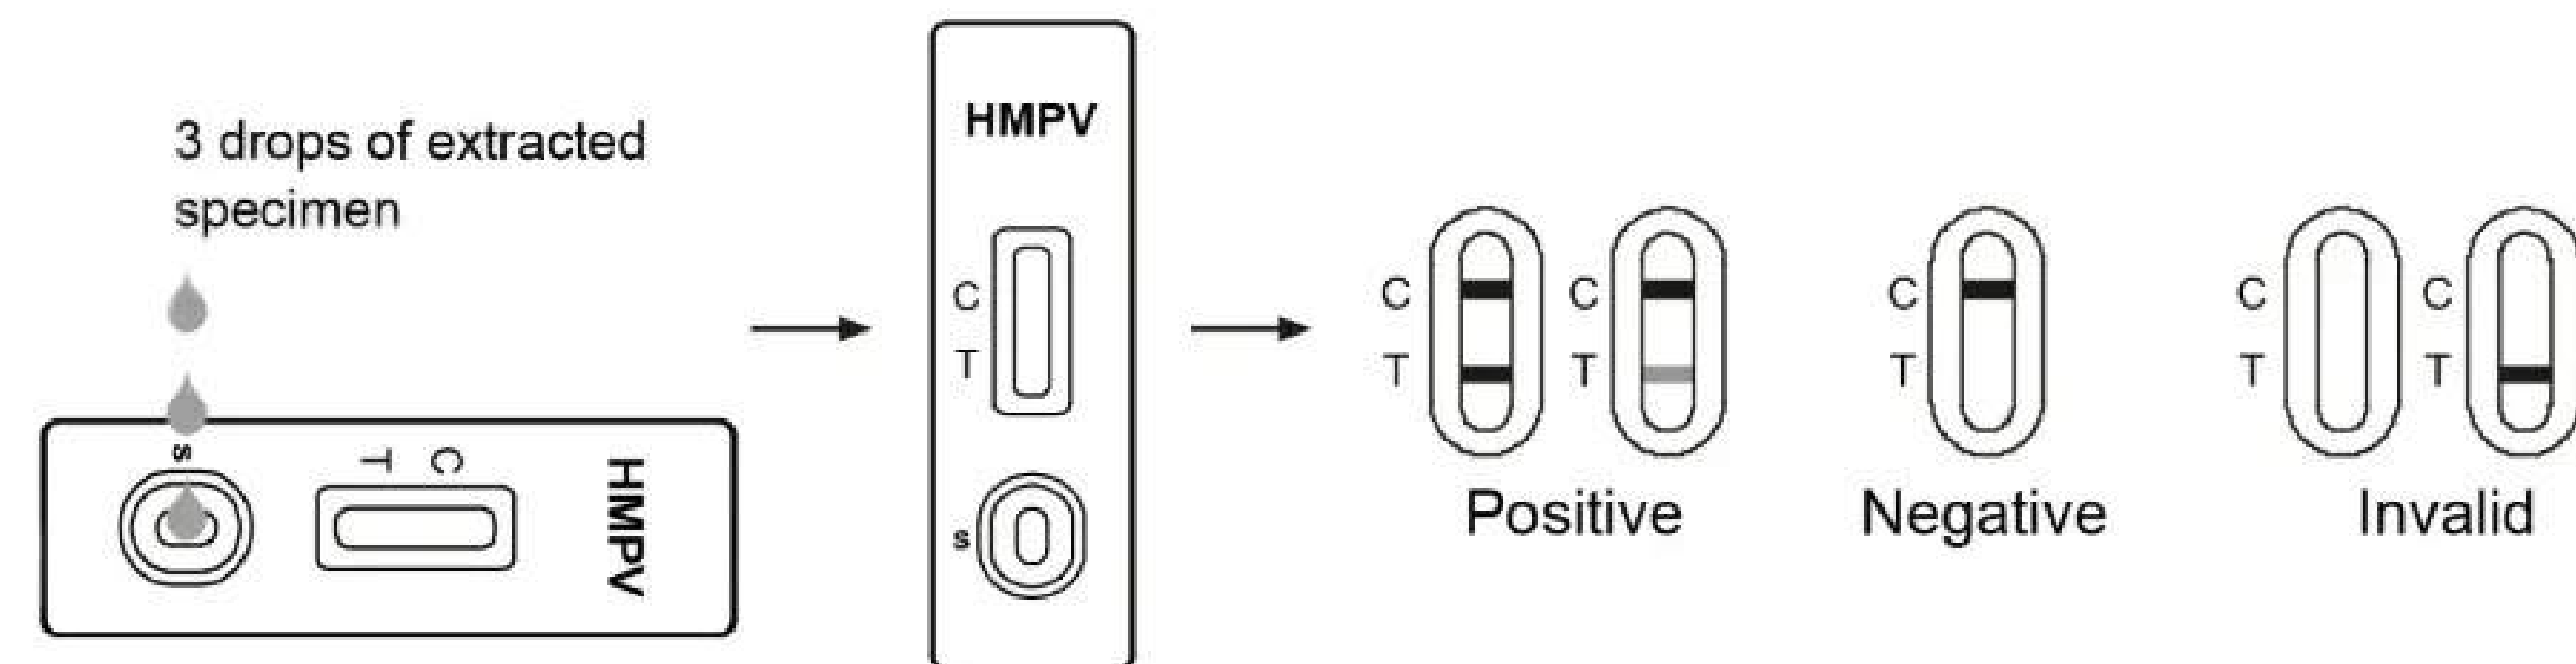

► Fast Results in 15 Minutes:

Enables rapid decision-making and timely patient management.

► High Accuracy:

Sensitivity: 91.7%; Specificity: 99.1%; Accuracy: 96.5%

CONVENIENT PROCEDURE
